motion sensor
Infrared fields sense the areas above and in front of the can so it opens automatically with just the wave of your hand.

fast, smooth and whisper-quiet
A precision motor and planetary gear system produces smooth, steady power — and you won't hear a thing.

neat and easy
The outer lid lifts up for easy access to the liner — no need to remove the top of the can or fumble with a bucket. When you're done, it closes over the liner to keep it neatly out of sight.

liner pocket
Keep liners where you need them. Dispense them one by one — no perforations or unraveling — from inside the can for a faster liner change.

energy efficient
Lasts up to 1 year with 4 alkaline AA batteries (included).

custom fit liners
Code J liners are designed to fit this can perfectly and are extra strong to prevent leaks and tears. Refill packs dispense liners one at a time and store perfectly in cans with our new liner pocket feature.
