

HYDRAULIC CYBORG HAND

Build your own Hydraulic Cyborg Hand and experience the fun of a cyborg world!

The Hydraulic Cyborg Hand simulates the movements of a human hand using hydraulic power for mechanical transmission without electricity. It allows every finger joint to adjust at different angles for a precisely closed fist or open palm. You can use different grip techniques to hold a variety of items, such as bottles, balls or tiny screws, making it an interesting and fun challenge.

The lightweight, 4-fingered Hydraulic Cyborg Hand is easily manipulated by your fingertips - just push and pull to activate the hydraulic transmission system. Now, put on your Hydraulic Cyborg Hand and try giving a thumbs-up, a wave or shake your hydraulic Cyborg hand to amaze your friends for some fun. Challenge your mighty Hydraulic Cyborg Hand using your imagination!

This fun, wearable device can be used perfectly by either right-handed or left-handed users, due to the innovative, adjustable design. Users can switch the thumb to make it operation-friendly, depending on their preference! You can easily adjust the hand to suit a wide variety of hand sizes (palm and finger lengths) – your cyborg hand device will fit and work smoothly for both kids and adults.
