Baby tracker

Your Peace of Mind, Their Comfort.

After having your baby, your child's well-being quickly becomes the focal point of many conversations, google searches and a constant loop of wondering and worrying. The answer can be found by tracking your baby's breathing and resting habits.

The Solution? The Motorola Comfort Cloud. It includes 2 essential parts: a smart sensor that monitors your baby's breathing and heart rate & a comfortable lounger with a machine-washable cover. Plus, you don't have to attach wearable sensors to your baby's body, to know they're ok.
