#### **Chapter 1: Introduction**

#### **1.1 Product Features**

- High-speed data transfer rate of up to 600Mbps, ideal for bandwidth-intensive HD video or 3D video streaming and online gaming
- Features energy saving mode to reduce power consumption
- Up to 300-meter range over a home's electrical circuit for better performance through walls or across floors
- Built-in QoS assures the quality of bandwidth sensitive applications such as voice, video and online games
- Supports IGMP managed multicast IP transmission, optimizing IPTV streaming
- Compatible with all AV500 & AV200 Powerline adapters (HomePlug AV)
- Integrated power socket with noise filter

#### **1.2 Application**

- High-definition (HD) and standard-definition (SD) video distribution
- Broadband Internet sharing
- Internet Protocol Television (IPTV) and Voice over Internet Protocol (VoIP) applications

#### **1.3 Compatibility**

AV600 powerline devices (HomePlug AV standard) are incompatible and cannot be used with 14Mbps and 85Mbps powerline devices (HomePlug 1.0 and 1.1 standards).

### **1.4 System Requirements**

Operating System	Utility supports Windows XP/Vista/7/8
CPU	Intel Pentium III 1.0GHz (or above)
RAM	256MB (or above)
Free Disk Space	100MB (or above)
Network Interface	Ethernet port (100Mbps or above) and an Ethernet cable

### Chapter 2: Interfaces

#### 2.1 LEDs

LED	Status	Description
	Green	LAN port connected
LAN1-3	Blinking	LAN activity (transferring data)
	Off	LAN port not connected
A PLC	Green	The green indicator turns on and the green indicator turns blinks slowly when the device is detecting a powerline link. The green indicator turns on and the green indicator turns blinks quickly to indicate data is being transferred over the powerline link.
	Off	No other PLC device detected
Φ	Green	Powered on
PWR	Off	Powered off

### 2.2 Button

Interface	Description
Integrated	The integrated electrical socket enables additional
Power Socket	terminal devices or multiple socket to be connected to

	the adapter, just as a normal wall socket would.
	This is a Gigabit Ethernet port for connecting to a computer or other devices with a network port.
Ethernet Port Group	Creates an encrypted powerline network group automatically (press the button for less than 3 seconds).
	Leaves an encrypted powerline network group (press the button for 8~12 seconds).
Reset	Restores the powerline adapter to factory defaults (press the button for 8~12 seconds).

### 2.3 Gigabit Ethernet Port

You can connect the powerline adapter to a router, a computer, or any network device via this Gigabit Ethernet port.

#### 3.1 Win 8

- **Step 1** Before installing the utility software, make sure that no other powerline utility is installed on your computer. If any other utility software is installed, uninstall it and reboot the computer.
- **Step 2** Insert the CD into your CD-ROM drive. When the following EZmax Wizard appears, select your model.

**Step 3** Then click "Setup Utility".

**Step 4** Click right button on WinPCap4.1.2 then click "Properties".

**Step 5** When the "Edimax PowerLine Utility" setup wizard appears, click "Next" to continue.

**Step 6** In the "License Agreement" screen, please select "I Agree" and then click "Next" to continue.

**Step 7** Select where you want to install the utility software, and then click "Next".

Step 8 If you confirm to install the utility, click "Next".

**Step 9** After the installation is complete, click "Close".

**Step 10** An icon will appear on your desktop. Click the icon to open the utility software.

**Note:** You can manage all the connected powerline adapters with the utility software. However, installing the utility software is optional.

### Chapter 4: Using the Utility Software

#### 4.1 Main Tab

The "Main" tab provides a list of powerline adapters connected to the network. The upper panel displays local powerline adapters. The lower panel displays remote powerline adapters in the network.

		Passwood	Speed (Mips)
cuity	Det Har	s Enter Inserved	Scan
twork Name: [i to 24 chara.]	HomePingAV e-wez whom Facewood	Set	

Set Name	Select a device and click "Set Name" to rename the device.			
Enter Password	by default, this column is blank. Select a device and click			
	"Enter Password" to set up a password for the device.			
Scan	Click "Scan" and the utility software will perform an			
	immediate scan of other remote powerline adapters. By			
	default, the utility automatically scans every few seconds.			

#### 4.2 Diagnostics Tab

The "Diagnostics" tab displays the system information and history of all remote devices.

The upper panel displays technical data concerning the software and hardware on the host computer and the lower panel displays the history of all remote devices.

#### 4.3 About Tab

The "About" tab contains some basic information about the software. You can also enable or disable the autoscan function under "Preferences".

#### Chapter 5: Group Button

This section demonstrates how to add or remove devices from a HomePlug AV network with the "Group" button.

#### 5.1 Forming a HomePlug AV Logical Network

When two devices with different group keys are connected to the same powerline and you want them to form a logical network, follow the following procedures:

- Step 1 Press and hold the "Group" button on adapter A for less than 3 seconds. The Power LED will start to blink.
- **Step 2** Within 120 seconds after the Power LED starts blinking on adapter A, press the "Group" button on adapter B for less than 3 seconds.
- **Step 3** Wait for the connection to be established.

### Network AB

#### 5.2 Joining a Network

If you want to add a new powerline device to an existing network, follow the following procedures:

- **Step 1** Press the "Group" button on an adapter in the existing network (adapter A or B) for less than 3 seconds. The Power LED will start to blink.
- **Step 2** Within 120 seconds after the Power LED starts blinking on adapter A or B, press the "Group" button on the new adapter (adapter C) for at least 3 seconds.
- **Step 3** Wait for the connection to be established.

#### 5.3 Leaving a Network & Joining another Network

If you want to remove a powerline device from an existing network and add it to another network, follow the following procedures:

- Step 1 Press the "Group" button on the adapter to be removed (adapter B) for at least 10 seconds.
- **Step 2** Wait for adapter B to be disconnected with adapter A & C.
- **Step 3** Press the "Group" button on an adapter in another network (adapter D) for less than 3 seconds. The Power LED will start to blink.
- **Step 4** Within 120 seconds after the Power LED starts blinking on adapter D, press the "Group" button on adapter B for at least 3 seconds.
- **Step 5** Wait for the connection to be established.

#### Chapter 6: Troubleshooting

If your powerline adapters have difficulty communicating with each other, try the following procedures:

- Try power cycling the unit by unplugging it from the electric outlet for 10 seconds and plugging it in again.
- Use a pin to hold the reset button down for 2 seconds on each unit you are trying to connect. The units will reset and attempt to establish a connection using factory default settings.
- Try plugging the powerline adapter into an adjacent electric outlet.
- Powerline adapters work better when plugged directly into an electric outlet. Using a power strip or surge protector may degrade network performance or completely block network signals.
- This powerline adapter should not be used on GFI protected electric outlets, as some outlets will filter out the powerline signal.
- This powerline adapter should not be used in areas with excessive heat.
- Certain florescent or incandescent lights are noise sources that can degrade performance.
- If your building has more than one circuit breaker box, your powerline adapters may not be able to establish a connection across different circuit breaker boxes. In such cases, try establishing a connection across different circuit breaker boxes by linking two powerline adapters together with an Ethernet cable.

#### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio technician for help.

#### **FCC Caution**

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

#### Federal Communications Commission (FCC) Radiation Exposure Statement

This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 2.5cm (1 inch) during normal operation.

#### Federal Communications Commission (FCC) RF Exposure Requirements

SAR compliance has been established in the laptop computer(s) configurations with PCMCIA slot on the side near the center, as tested in the application for certification, and can be used in laptop computer(s) with substantially similar physical dimensions, construction, and electrical and RF characteristics. Use in other devices such as PDAs or lap pads is not authorized. This transmitter is restricted for use with the specific antenna tested in the application for certification. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

#### **R&TTE Compliance Statement**

This equipment complies with all the requirements of DIRECTIVE 1999/5/EC OF THE EUROPEAN PARLIAMENT AND THE COUNCIL of March 9, 1999 on radio equipment and telecommunication terminal equipment and the mutual recognition of their conformity (R&TTE). The R&TTE Directive repeals and replaces in the directive 98/13/EEC (Telecommunications Terminal Equipment and Satellite Earth Station Equipment) As of April 8, 2000.

#### Safety

This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.

#### **EU Countries Intended for Use**

The ETSI version of this device is intended for home and office use in Austria, Belgium, Bulgaria, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Turkey, and United Kingdom. The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.

#### **EU Countries Not Intended for Use**

None

### **EU Declaration of Conformity**

**English:** This equipment is in compliance with the essential requirements and other relevant provisions of Directive 2004/108/EC, 2009/125/EC. Français: Cet équipement est conforme aux exigences essentielles et autres dispositions de la directive 2004/108/EC, 2009/125/EC Čeština: Toto zařízení je v souladu se základními požadavky a ostatními příslušnými ustanoveními směrnic 2004/108/EC, 2009/125/EC. Polski: Urządzenie jest zgodne z ogólnymi wymaganiami oraz szczególnymi warunkami określonymi Dyrektywa UE 2004/108/EC, 2009/125/EC. Română: Acest echipament este în conformitate cu cerințele esențiale și alte prevederi relevante ale Directivei 2004/108/EC, 2009/125/EC. Русский: Это оборудование соответствует основным требованиям и положениям Директивы 2004/108/EC, 2009/125/EC. Ez a berendezés megfelel az alapvető követelményeknek és más vonatkozó irányelveknek Magyar: (2004/108/EC, 2009/125/EC) Türkçe: Bu cihaz 2004/108/EC, 2009/125/EC direktifleri zorunlu istekler ve diğer hükümlerle ile uyumludur.
