

Camping Lamp Kvitnes

80120 (black)

80160 Set of 2 pcs.

SAFETY INSTRUCTIONS

- Read these instructions for use completely before using the product and keep them for future reference.
- Children should be supervised at all times when using the product.
- Do not disassemble or modify the product on your own.
- Do not use the product in heavy rain or temperatures below -10°C or above $+50^{\circ}\text{C}$.
- We recommend fully discharging and recharging the rechargeable battery at least once every 3 months to prolong its life.
- Only use the cable included to charge the lamp.

Charging time: approx. 4.5 hours, via USB cable

Operating time: approx. 3 - 70 hours, depending on brightness level

Colour temperature: 3000K Warm White

Use

Charging: Integrated into the top of the lamp is a micro-USB port for charging the lamp with the included USB charging cable. Fully charge the lamp before using it for the first time. The lamp should remain switched off during the charging process. The solar panels integrated in the top of the lamp also support the charging process. The 4 blue lights in the top of the lamp indicate the battery charging level when switched on.

Switch on: Press the on/off button once to switch on the fold-out side parts of the lamp (highest level). **Function change:** Press the on/off button twice to dim the fold-out side parts of the lamp to low level.

Press the on/off button 3 times to switch on the bottom of the lamp (highest level).

Press the on/off button 4 times to dim the bottom of the lamp to low level.

Press the on/off button 5 times to switch on both the fold-out side parts and the bottom of the lamp simultaneously (highest level).

Press the on/off button 6 times to make both the fold-out side parts and the bottom of the lamp flash simultaneously (highest level).

Remark: The different positions of the side parts (folded out or folded up) allow a variety of lighting possibilities.

Switch off: Press the on/off button a 7th time to switch off the lamp.

Powerbank function: Integrated into the top of the lamp (next to the micro-USB port for charging) is a USB port for charging mobile devices. Please refer to the instructions for your end device.

Technical data

LED specifications: 72 x SMD LED

Luminous flux: 400 lumen

Battery capacity: 3 x 2000 mAh

Input / Output: Micro-USB / USB

Protection class: IPX3

Material: ABS

Dimensions: approx. $\varnothing 7.3 \times 16.0$ cm

Net weight: approx. 232 g
