

AFERIY

Data Usage Information

Manufacturer: AFERIY
Version: 1.0
Date: July 2026

Products Covered

AFERIY P180 (1800W)
AFERIY P210 (2400W)
AFERIY P280 (2800W)
AFERIY P310 Pro (3600W)

Connectivity

These products support Wi-Fi connectivity through the AFERIY mobile application for remote monitoring, device management and firmware updates.

Data Processed

Device ID, device model, firmware version, battery level, charging/discharging status, input/output power, operating status, diagnostic information and network connection status.

Purpose of Data Processing

Remote monitoring; device management; firmware updates; performance optimization; diagnostics and customer support.

Personal Data

The power station itself does not directly collect personal data. If users register an account in the AFERIY App, personal information is processed in accordance with the applicable AFERIY Privacy Policy.

Data Sharing

AFERIY does not sell users' personal information. Data is processed only as necessary to provide product functionality and customer support.

Data Security

Appropriate technical and organizational measures are implemented to protect data against unauthorized access, alteration, disclosure or destruction.
