A schematic diagram of a double-acting hydraulic cylinder. The cylinder is shown in a longitudinal section. It has two main chambers: the front chamber (left) and the rear chamber (right). The front chamber has a larger diameter than the rear chamber. The piston is located in the center, with a rod extending from the front. The rod has a seal at the front end. The cylinder has four ports: 1. Inlet port for extension (top left), 2. Outlet port for extension (top right), 3. Inlet port for retraction (bottom left), and 4. Outlet port for retraction (bottom right). The ports are labeled with numbers 1, 2, 3, and 4 in blue circles. The diagram shows the internal components, including the piston, rod, and seals.

-
- Two white PlayStation 5 DualSense wireless controllers are shown side-by-side, angled towards each other. They feature the standard PS button layout with light bar on top and the 'PS5' logo on the front.
