# ANNA — is hot!

Variable adjustable thermostat Slim design

High security level: Tip over switch with automatic shut-off

Anna raises the temperature! Not just because of her hot looks, but mainly because this wonderful little heater is equipped with a modern PTC ceramic heating element. Anna heats discreetly and quietly with two power levels, bringing agreeable warmth. But the clever heater also stands for safety in two respects: no overheating thanks to the self-regulating heating element and automatic shut-off thanks to integrated tilt protection. If additional warmth is needed in certain places (e.g. under the desk) or in a small space, Anna little is also „hot“ enough.

## Specifications

Power: Anna 1'200 / 2'000 watt

Power: Anna little 700 / 1'200 watt

Thermostat / 2 speed levels

Room size: Anna up to 25 m<sup>2</sup> / Anna little up to 15 m<sup>2</sup>
