

SAFETY INSTRUCTIONS & HEALTH WARNINGS

CAREFULLY READ AND FOLLOW

THESE BASIC SAFETY INSTRUCTIONS MUST BE FOLLOWED WHEN INSTALLING AND USING THIS SPA ELECTRICAL EQUIPMENT:

Second, installation of your Spa plug into the RCD and press the 'reset' button.

The Electrician instructions must meet local standard requirements.

All certified appliances should be permanently connected to the fixed wiring.

Do not use an extension cable or connect the Spa to the electrical supply as it reduces the chance of an electric shock.

If you notice the supply cord is damaged, it should be replaced by the manufacturer, the distributor or a qualified technician to avoid any danger.

Never use an external electrical appliance whilst in the Spa or if your body is wet. Keep all electrical appliances such as telephones, TVs, Radios or laptops 3 metres away from the Spa.

Avoid the danger of accidental drowning by using extreme caution to prevent children accessing the Spa, without Adult supervision at all times. Our Spas lockable buckles on the cover, which once used secure your hot tub from being accessible. A key is included to lock and unlock the buckles.

Keep your pets away from your Spa at all times.

Avoid danger by never switching your Spa on if there is the chance of the water inside being frozen.

Avoid danger to children and pets by always locking the cover on the Spa after use and never operate the cover function if the cover is in place.

To reduce the chance of static electric shock, ensure ground sheet (11) is used correctly at all times. When entering the spa, ensure you always step on the ground sheet first before entering the spa.

Using medication, drugs or alcohol whilst using your Spa may cause unconsciousness leading to the danger of drowning or hypothermia, or falling to realize when to safely exit the Spa, or failing to recognize potential dangers. If pregnant, you should never use the Spa as it may cause exposure to the unborn fetus.

Please consult your GP before using your Spa. If you have a history of high or low blood pressure, heart disease, diabetes or circulation problems, or if you are taking medication we advise you consult your GP before using the Spa. If you feel drowsy or uncomfortable exit the Spa.

To mitigate the risk of injury due to water temperature, your Spa should never be higher than 40°C (104°F). A water temperature of 37°C (98°F) is considered to be safe for a healthy adult, but water temperature should be used for children, or when you are in the Spa for more than 10 minutes.

ADDITIONAL WARNINGS

The Spa should never be left set up in temperatures below 50°F (10°C), as this can cause irreparable damage when you finally use it.

The Spa should never be switched on when empty as this can cause irreparable damage to the pump when you finally use it.

The Spa should never be supplied through an external switching device, e.g. a timer, or connected to a circuit regularly switched on and off. This could lead to danger due to the insulation reselling of the thermal circuit.

Always add accessories to the water (not water to the chemicals) to avoid strong fumes, or reactions which could result in a dangerous chemical spillage.

The base where the Spa is installed on must be level, flat, smooth and capable of supporting the combined weight of the Spa, water and users. This is approximately 850 Kg for a 4 person Spa, and 1,000Kg for a 6 person Spa. An adequate drainage system must be provided to handle the water overflow.

Should the Spa be installed on a base which does not meet these requirements, any damage caused will nullify the warranty.

It is the strict responsibility of the Spa owner to ensure that all the above requirements are met at all times.

THIS PRODUCT IS NOT SUITABLE FOR CHILDREN UNDER THE AGE OF 14
