## To See Safely and Be Seen Friendly RAVEMEN CR1000 with Anti-glare T-shaped Beam

With max 1000 lumens and 4000 mAh high-capacity rechargeable battery, RAVEMEN CR1000 is a high performance bike light for riders that ride at a fast speed and long distance at night.

Using the second generation of RAVEMEN's anti-glare lens, CR1000 gives out a T-shaped beam with close-range flood light and long-distance spotlight while has no dazzle to other road users, great for urban riding or daily commuting.

The wired remote control button included helps riders change the brightness easily and safely without releasing the handlebar. For ultra-long distant cycling, riders can connect the light with external power to extend runtime.

Made with durable and light-weight aluminum, the light passed 1 meter impact resistance test and it is IPX6 water resistance. Thanks to the integrated design, it is also very compact without extra wires and bulky external battery pack.
