DUAL CHARGING DOCK

For P-4 Wireless Controller

Slim **Pro**

Operation Instruction:
1. Drive the controller and connect the MICRO USB to the MICRO jack of charging stock to start charging.
2. Put P-4 Wireless Controller on the charging stock in frontstand, adjust the MICRO jack right horizontally.
3. The indicator light in the charging stock can indicate the charging state. With the light on, the stock is charging the controller.
4. With the charging finished, the indicator light goes out, and there's no indicator light in the charging jack.
5. P-4 Wireless Controller can automatically enter the charging state. When it has power, it charges automatically, when it has no power, it charges automatically.

 **Notice** This product does not contain a controller.
