

KOFIRE

# BG-05

Professional wireless gaming headset+  
gaming low-latency transmitter

Compatible with multiple gaming consoles

### 40mm driver enhanced speaker unit (40mm驱动器增强扬声器单元)

The 40mm driver enhances the speaker unit, making the sound field more open and vivid, and the sound quality is clear and transparent. More effective restoration of the real sense of the scene.

### Low-latency gaming chip (低延时游戏芯片)

Low latency gaming chips greatly reduce latency. The sound is synchronized with the picture, and the sound can get feedback faster, allowing you to react faster than your opponent.

### Detachable noise reduction microphone (可插拔式降噪麦克风)

Detachable omnidirectional microphone design. When the microphone is turned on, it can be closer to the sounding area, which can effectively capture your voice clearly and effectively reduce the surrounding interference noise.

### Switch 3d immersive sound effects (一键切换3D沉浸式音效)

Wear headphones to experience the 3D surround effect, creating the most realistic live sound, taking you into the game world, and an immersive experience.

### Ergonomic wear (人体工程学佩戴)

The fully-enclosing earmuff design allows the headset to fit the ear more comfortably. The wearing experience test is repeated to ensure that the user's comfort can be maintained even after long-term wearing.
