

STRING LIGHT INSTALLATION INSTRUCTIONS

INSTALLATION METHODS

1. Using a Guide Wire with S-hooks or zip ties (not included)

2. Attached to a Structure

RE-LAMPING STRING LIGHTS

WARNING-RISK OF ELECTRIC SHOCK!! Disconnect power at source prior to re-lamping String Lights.

For outdoor String Lights, do NOT re-lamp light strings during rain or when wet.

1. Re-lamp String Lights only during dry and calm weather conditions.
2. Unscrew existing lamps by lightly holding the socket in one hand and twisting the lamp counterclockwise. Lamps may be tight in the sockets. This is normal to prevent moisture from getting into socket.
3. Replace with medium base lamp. Screw bulb into socket clockwise until top of socket forms a tight seal around bulb and bulb makes solid contact with socket. **Do not exceed 1100 watts all sets combined.** Suitable for Incandescent, CFL, LED or CCL lamps.
