Clean and prepare a surface for installation

Glue to a surface of installation

Insert the power adapter into the socket

Press once "□", light strip lights on. One more time press «□», light strip is off. Press and hold «□», to choose light color.

Intellectual operation

1. Scan two-dimensional code or download Yeelight mobile application in App store.
 2. To ensure that the power light is switched on, open a program and follow the instructions in the application.
- * Make sure that Wi-Fi and Internet connection are available.

This product and intellectual platform support MIUI system, and be in a network relationship with the rest of intellectual platform products.

Reset to factory settings

Disconnect the power adapter, press and hold a power button for 5 seconds, and when the light strip run colors - red, green, blue, release a button. When indicator light will change color to yellow, it would mean that the reset was successful.

* When the light strip used in new scheme, update the factory settings and connect the light strip with this scheme.

Cautions

1. Before using this product, check the voltage that is supplied to him; voltage mismatch can cause damage to the product and present danger.
2. The LED module is not replaceable, disassemble the product without permission.
3. Light power allocates heat during exploitation, so you need to ensure environmental air ventilation to cool the light strip.

Main parameters

Model: YLDD01YL;

Color mode: RGB;

Lifetime: about 25000 hrs;

OS: Android i OC IOS;

Wireless connection: Wi-Fi IEEE 302.11 B / G / N 2,4 GHz;

Temperature range: -10- + 40°C;

Humidity range: 0% - 85%;

Input voltage: 12 B, 1 A (-)-(-(+);

Power: 100-240 V, ~ 50/60 Hz, 0,5 A;

Capacity: 12 Wt (60 x 0,2 elements / LED module).

Content of harmful substances in the product

Name of part	Harmful elements					
	(Pb)	(Hg)	(Cd)	(Cr (VI))	(PBB)	(PBDE)
Light strip	○	○	○	○	○	○
Controller	○	○	○	○	○	○
Adaptor	×	○	○	○	○	○
Cable	×	○	○	○	○	○
Box	○	○	○	○	○	○

This table meets SJ / T 11364 standard
 ○: It indicates that an amount of hazardous substances in the material of the part is less, than the limit specified by GB / T 26572.
 ×: Indicates that at least one of the components of dangerous substances are present in excess of the limits specified in GB / T 26572.
