Important Tips

This appliance can be used by children aged 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Check the sieve for damage every time you use the appliance. Do not use the appliance if the rotating sieve is damaged.

Always disconnect appliance from the mains supply socket if it is left unattended and before assembling, disassembling or cleaning.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

• Never use the appliance for anything other than its intended use. This appliance is for household use only. Do not use this appliance outdoors.

• Always ensure that hands are dry before handling the plug or switching on the appliance.

• Always use the appliance on a stable, secure, dry and level surface.

• This appliance must not be placed on or near any potentially hot surfaces (such as a gas or electric hot).

• Never immerse any part of the appliance or power cord and plug in water or any other liquid.

• Never let the power cord hang over the edge of a work top, touch hot surfaces or become knotted, trapped or pinched.

• Do use the appliance if it has been dropped, if there are any visible signs of damage or if it is leaking.

• Never use any accessory or attachment not recommended by the manufacturer.

• Switch off the appliance before changing accessories or approaching parts which move during use.

• Allow moving parts to come to a stop before opening or cleaning.

• Never clean your fingers, utensils or any other object into feeding tube. Always use food pusher.

• Never attempt to remove or replace any part of the appliance whilst it is in operation.

• Ensure that the appliance is switched off and unplugged from the supply socket if it is left unattended and before assembling, disassembling or cleaning.

• Never immerse any part of the appliance or power cord and plug in water or any other liquid.

• Never use harsh, abrasive or caustic clean this appliance.

ROCHESTER

JUICER

INSTRUCTION MANUAL

To fully benefit from the item we offer, please read this manual carefully before using and keep for future reference.

Product Features

1. Food pusher

For safely pushing whole fruit and vegetables into the professional juicer's feed chute. Dishwasher safe.

2. Juicer cover

Dishwasher safe, duration, clear cover.

3. Stainless, micro mesh sieve

Dishwasher safe.

4. Bowl

Up and down adjustable.

5. Juice outlet

Up and down adjustable.

6. Motor base

High performance, 800W copper motor.

7. Pulp container

Safety arm

8. Safety arm

9. Collection container

10. Power button

2

How to use

⚠ Be careful when handling the stainless-steel sieve. Do not touch the small sharp blades inside the sieve.

Place the motor base on a flat, dry surface such as your kitchen worktop. Ensure that the 3-position switch is in the off (O) position then switch the appliance off at the power cord and unplug the cord.

1. Fit the bowl onto the motor base. The spout on the filter bowl should be on the same side of the motor base as the safety locking arm.

2. Gently push the sieve down onto the motor base drive coupling until it clicks into place. Make sure that the sieve is fitted securely inside the bowl and unto the drive coupling.

3. Place the juicer cover over a bowl. The feed chute should be positioned over the stainless-steel sieve.

4. Pivot the safety locking arm upward until it engages with two grooves in the juicer cover. The safety locking arm should now be vertical and locked into place on the top of your juicer. If this doesn't fit into place easily, don't force it. Check that you have fitted the juicer cover correctly.

5. Tilt the large pulp container slightly and place it underneath the pulp outlet side of the juicer cover.

6. Fit the lid onto the juice jug. Position the juice outlet spout on the right-hand side of your juicer.

7. Place the food pusher into the feed chute. The food pusher has a groove in it which must be lined up with the protrusion inside the feed tube.

Problem and Solution

Problem	Solution
The appliance does not work.	The appliance is equipped with a safety system. If the parts have not been assembled properly, the appliance does not work. Switch off the appliance and check if the parts have been assembled in the right way.
The appliance slows down during use.	The integrated pulp container has reached its maximum capacity. Switch off the appliance and remove the pulp from the integrated pulp container.
The appliance makes a lot of noise, gives off an unpleasant smell, is too hot to touch, gives off smoke etc.	It is very common for a new appliance to give off an unpleasant smell or emit smoke the first few times you use it. This will stop after you have used the appliance a number of times. The appliance may also give off an unpleasant smell or emit some smoke if you process too many ingredients at once or if you let the appliance operate too long. In these cases, switch off the appliance and let it cool down for 60 minutes.
The filter touches the feeding tube or vibrates strongly during processing.	Switch off the appliance and unplug it. Check if the filter is placed correctly in the juice collector. The ribs on the filter must be aligned with the ribs on the driving shaft. Check if the filter is damaged. Cracks, crazes, a loose grating disc or any other irregularity may cause malfunction.
The filter is blocked	Switch off the appliance, clean the feeding tube and the filter and process a smaller quantity.

4

Cleaning

⚠ Do not immerse the motor base, cord or mains plug in water or any liquid. The stainless-steel sieve and feed chute contain sharp parts. Do not touch these parts when handling or cleaning.

- For easy cleaning – immediately after each use rinse removable parts under running water (to remove wet pulp). Allow parts to air dry.
- After disassembly the unit all removable parts may be washed in hot soapy water.
- The juicer cover, bowl, large pulp container, stainless steel sieve and juice jug are dishwasher safe. Only wash the top shelf of your dishwasher.
- Wipe the motor base with a damp cloth. Do not immerse the motor base in any liquid.
- Before washing the juicer jug, remove from the froth separator by lifting it up and out of the jug. Rinse the jug and separator under running water.
- Discoloration of the plastic may occur with strongly colored fruit and vegetable. To help prevent this, wash parts immediately after use.
- If discoloration does occur, the plastic parts can be soaked in 10% lemon juice and water or they can be cleaned with a non-abrasive cleaner.
