

How to play

Before you start playing, stack the cans in the desired location in a pyramid formation. The game can be played indoors and outdoors.

Decide on a throwing distance depending on the age and ability of the players.

Toss the three coloured throwing bags at the cans and try to knock over as many cans as possible.

Aim of the Game

The players try to knock down the pyramid of cans with the help of the throwing bags. Each participant has 3 throws per round. The first player to knock down the most cans in a series of rounds wins the game!

If the cans remain standing, the numbers on the remaining cans are added up. The player with the lowest total wins.
