INSTRUCTION MANUAL

Reed Instruction manual carefully before use

Heating Speed Blender

Product function description

1. Function area

Heating function: fragrant soybean milk, rice paste, health rice paste, corn juice and baby porridge Non-heating function: fruit and vegetable juice, sauce, milk-shake and smoothie.

Heating without wall-breaking function: rice paste, heath tea, steaming and boiling.

2. Status display

Show temperature, such as 25 °C, time 16:10 and operating status. The status bar will change with the working process of menu function. --- represents selection functions, such as standby etc. E2 represents no starting due to uncapped glass cup. P1 represents gear 1. END represents end.

3. "Function selection" key

Press startup and function keys (press the function key once, the indicator light will skip one menu press once for one skip, press twice for two skips, and so on. You can press the function key to let press once to one appropriate the indicator light stop the required menu). Quickly press the startup key again. For example, if you want to rice paste menu: press the startup key, press the function key twice, and quickly press the startup key again. If the screen shows ----, please reset it again quickly.

4. "Start/stop" key This key is functioned as "startup-on-off" of power supply.

Confirmation: the display screen and all keys light up after connecting power. You can press the "function selection" key to choose the menu, and then press the "start/stop" key to start work; for example, press the "function selection" key, the "soybean milk" function in the display screen starts

flickering, and then press the "start/stop" key, the machine starts with "soybean milk". On: when the display screen and all keys light up, if no more operations, please press the "onoff/confirm" key to turn off all backlights. The machine has been shut down and return to the power standby state with only "on-ff/confirm" key flickering. (The machine will be automatically shut down after 15 seconds to return to the power standby state without any operation

Off: all backlights are on after pressing the "On-off/confirm" key in the standby state, that is, you can proceed the next function operation in the standby state.

5. "+/_" key

This key is used to adjust speed and appoint time (+/). Press the "+/" key in the standby state to adjust your needed speed, and then press the "on-off/confirm" key to start works. You can also press the "+/_" key to adjust speed in the working process. This function is only suitable for wall-breaking shattering and stirring. (You can press the "cancel" key to stop working after obtaining your satisfied state. Please note automatic stop is not available.

Heating Speed Blender

6. "Reservation" key

Press the "reservation" key after startup, press the "+" key to add time, or press the " "key to reduce time. Press once to add or reduce 30 min (the longest time: 12 hours; the shortest time: 30 minutes) The status bar will show the set time. Then, press the "function selection" key to choose the servation required; finally, press the "on-off/confirm" key. (The selected function and "reservation" key flicker at the same time, and the bar status starts countdown, which means to start with the

7. "Inching cleaning" key

his key is used for cleaning and meat mincing. Press this key after startup to activate the stirring nction, and release the key to stop stirring.

reservation method: reservation:

press the "startup" and "function" keys, press the 'reservation" and "+" keys, and finally press the "startup" key; or press the "startup" and

"reservation" keys, then press the "+ -" and "function" keys, and finally press the "startup" key.

heat preservation method: press the 'startup" and "heat preservation" keys,

and quicky press the "startup" key.

cleaning method: press the "startup" key, and press the "inching cleaning" key for 15 seconds(holding) (it will stop after releasing the finger). For super cleaning, you can add vinegar into the cup for 1-2 hours of soaking, and then press the "inching cleaning".

meat mincing notice: press the "function" key to select the mincing function with maximum 250g pork meat per time. The effect will be better after adding one egg or household cooking oil.
