Waterproof and Rechargeable DC672V Anti Bark Collar Product Manual

Please read this entire guide before beginning

Automatically

The DC672V Anti Bark Collar prevents your dog from barking through the humane application of a behavior-modifying single beep, combination of beep and vibration.

Main Features

- Quick and easy to test
- LED indicator lights
- Digital display for different sensitivity levels
- Seven sensitivity levels for different dogs (level 1 is the lowest, level 7 is the highest).
- Two alternative working modes (beep, beep+ vibration).

Components

1pc of collar with strap; 1pc of English manual;
 1pc of mini spanner; 1pc of charging cable;
 2 sets of probe (1 set already fixed on the collar);

Operation Instructions

Press the "M" button for 2 seconds to turn the collar on. Then press the "M" button to choose the mode.

Green LED light (☐) means it's under Beep Mode;
 Blue LED light (⬢) means it's under Beep & Vibration Mode;

Press the "S" button to adjust the 7 sensitivity levels.

Press the "M" button for 2 seconds to turn it off.

After turned on again, it automatically returns to the mode and sensitivity level where it was before.

Mode	Barks	LED Light Status	Remarks
Beep	1st-2nd	Green light remains on	Based on all the barks occur within 30s.
	3rd-7th	Green light flashes quickly	
	8th	1 minute sleep mode, green light flashes slowly	
Beep + Vibration	1st-2nd	Blue light remains on	The collar resumes back to be normal after 1 minute sleep mode.
	3rd-7th	Blue light flashes quickly	
	8th	1 minute sleep mode, blue light flashes slowly	

Test the Anti Bark Collar

Press the "M" button for 2s to turn it on, then blow into the hole of bark collar.

Note: the number showing on the LED screen will be on for 30s after turned on; then it will go out if no button is activated or pressed

- 1st blowing: 1.5s beep;
- 2nd blowing: 2.5s beep;
- 3rd blowing: 5s beep, then 1s vibration;
- 4th blowing: 5s beep, then 1.5s vibration;
- 5th blowing: 5s beep, then 2s vibration;
- 6th blowing: 5s beep, then 3s vibration;
- 7th blowing: 5s beep, then 4s vibration;

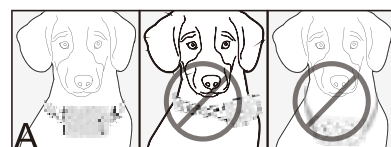

As a safety feature, the collar shuts down for 1 minute after the 7th correction level and resumes back to be normal afterwards.

Press the "M" button to choose the mode from "Beep", "Beep + Vibration".

Fitting the Collar to Your Dog

PLEASE ENSURE THAT THE COLLAR IS FITTED CORRECTLY.

1.Center the Metal Probes under your dog's neck(A)

2. The collar should be positioned snugly around your dog's neck.

Important: Make sure that you can fit one finger between the strap and your dog's neck(B).

Note: Choose the correct Metal Probes to suit the length of your dog's hair. If your dog has long hair or a thick coat, use the longer Metal Probes.

Charging Instructions

The collar needs to be charged when the red light continues flashing slowly for 30s, and then turns off automatically.

1. Open the Battery Charging Rubber Cover on the Anti Bark Collar, plug one end of the cable in the charging port and connect the other end to the adaptor, computer, notebook or power bank. The red light will blink when charging. (Note: please make sure that the adaptor output is 5V/500-1000mAh.)

2. Plug the Lithium Polymer Charger into an electrical power outlet of ordinary household voltage(110-230V) based on your local standard.
3. The red light will be steady on when fully charged within 1.5 to 2 hours.

Tips for Training Your Dog with the Anti Bark Collar

Please don't leave it alone when you first start training your dog.

You should train your dog with some commands (such as "NO!") when he or she barks, the collar reinforces the command. Your dog should be able to learn that the collar is to stop his/ her barks afterwards.

The collar is not supposed to be put on your dog for more than 12 hours per 24-hour period. Please take it off when not in use.

CAUTION!

- Do not allow your dog to chew the collar. Prevent your dog from scratching or clawing at that casing.
- This device is made of plastic and electronic components that are not digestible. Consult your vet immediately if your dog swallows any parts of this product.
- The collar is not intended for use as a restraining collar. If you are using a leash, use it with a separate restraining type of collar.

FAQs

Q: What kind of dogs are the collars suitable for?

A: The collar is adjustable in length from 9.5 to 26 inches. If your dog's neck is smaller than 26 inches, please cut the redundant part. This product is not suitable for dogs with necks larger than 26 inches or for dogs weighing less than 15 lbs.

Q: My dog barks, but the collar isn't activated.

A1: The collar might be running out of battery, please charge it.

A2: You might need to increase the sensitivity level by pressing the "S" button.

A3: The collar might be too loose to fit your dog's neck. Please tighten it to ensure no more than one finger can pass through.

Q: Can I attach a leash to the collar?

A: NO. This will result in the metal probes being pulled too tightly against your dog's neck. If you need to put a leash on your dog, put a separate NONMETALLIC collar on your dog's neck first.

Q: Is the bark collar waterproof?

A: It is weatherproof, such as walking on rainy day, but must seal well the charging port tightly and keep it dry after get wet.
