Installation

Insert USB cable of microphone to the device (compatible with Windows and Mac computers).

a. General operation for MAC OS)

Click the Apple symbol in the upper left corner of the screen and select System Preferences

Click „Sound” to open the Siund option

Select a device for sound input

Select „USB Audio” from the device list, and then adjust the input level

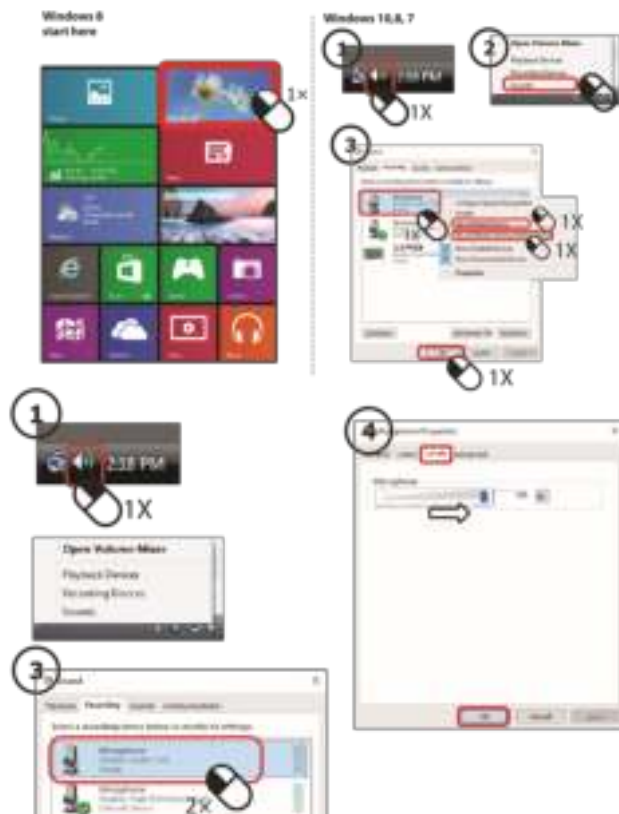

b. General operation for Windows

Open the start menu and click Control Panel

Open the sound preference from the Control Panel folder

Click „recording and choose „USN Audio”, then adjust the input level.

Important notes

1. Do not cover the microphone grille with your hands.
2. Regular maintenance is recommended, and pay attention to dust and moisture to avoid the electric instability and acoustic problems of the microphone.
3. Please use USB port to connect the microphone.
4. When the microphone is connected to a mobile phone, please make sure that mobile phone has a type C interface. (adapter is not included in the set)
5. The sound should be 150mm to 300mm far away from the microphone in the forward direction, keeping the microphone at 45° angle.
