

such as temperature and humidity will significantly reduce the performance of the protection.

CLEANING / LIMITATION OF USE

- Do not soak the protectors in water. Use exclusively water and soap together with a damp cloth to clean / remove the debris off the protection. Never use cleaning agents (these may lead to the degradation of the materials that compose the body protection).
- Leave to dry at room temperature or use a dry cloth.
- Do Not Machine Dry, a tumble dryer should not be used.

MAINTENANCE / CHECK-UP

- Check periodically the tightness of the screws of the stone shield regulating system.
- Check the inner foams to see if they are properly attached to the respective plastic parts and that the side pads are attached to the plastic parts with the rivets. Check that the retention mechanisms are strongly fixed to the plastic parts that make the equipment.

NOTE: Polisport will not be held responsible for any modification done on this equipment without previous written permission.

DISPOSAL

At the end of protection's useful life, do not discard it into the environment; dispose this product according to your local disposal requirements.

	Information notice leaflet

WARNING

After a severe impact during the activity of off-road motorcycle it is recommended to have the stone shield checked and in case of damage, please replace it.

Polisport will not be held responsible for any damage suffered by the user in case the above conditions were not met scrupulously. It is reminded (see inscription on the back plastic part) that this product is intended to protect the user's body from mud projection, stones and other debris thrown by other riders. This product is not conceived to protect the user from injuries or death resulting from falls or accidents. Certain impacts may exceed the protection capacity of this product. Never use this stone shield in case it is damaged or there are missing some of its components; this may result in body injuries or even death.
