

1. Background

As a result of the increasing number of people who are becoming more and more aware of the environment, the need for a more sustainable and responsible way of doing business is becoming more and more apparent.

2. Objectives

The main objective of this project is to develop a sustainable and responsible way of doing business that is both profitable and socially responsible.

3. Methodology

The methodology used in this project is a combination of qualitative and quantitative research methods. The qualitative methods include interviews, focus groups, and case studies. The quantitative methods include surveys and statistical analysis.
