

Smart T Shape Bicycle tail light

### Product Information

Smart O-shape Bicycle tail light can achieve high brightness brake alarm, detection of power, low battery indicator and smart light control function and so on by using cutting-edge intelligent technology. It provides great security protection for night riders and avoids the personal injury that caused bad brightness.

### Product Appearance

### Operating Instructions

- Pressing the power button for 2 seconds can turn on/off the tail light. Pressing power button shortly, vertical light bar can display the reminding battery power during power off. In addition, the light states of last shutdown will be restored after turn on again.

- The five light modes in the power-on can be switched cyclically by pressing the power button shortly:

1. Long light: the horizontal light bar is always on, and the vertical light bar is off.
2. Flashing: The horizontal light bar are continuously rapidly and circularly on / off and vertical light bar are off.
3. Breathing: The horizontal light bar gradually light up to gradually darkens until the light goes out, and circulates repeatedly and vertical light bars are off.
4. Double flash: the horizontal light bar turns on / off quickly, with an interval of 1 second, and the vertical light bar is off.
5. Light control: all the lights are off, and the ambient light is dark, the horizontal light bar will be on automatically

- Two kinds of automatic lighting modes in power-on:

1. As long as the brake action is sensed, all the lights are on in a bright state;
2. When the vehicle falls to the ground, all lights will alarm with a flashing state of 3 long and 2 short

- Charging: Pls use 5V 1A adapter to charge the tail light

- Endurance: The longest endurance time is 350 hours (light control, daytime mode); The shortest endurance time is 3.5 hours (rotation mode); standby (under full power) about 18 months.

- Installation: Firstly, put the tail light on bicycle seat tube and then use snare buckle to fix around tube and adjusts the suitable direction. Finally, tight with a cable tie.

### Product parameters

1	Battery	1400mAh	6	Waterproof level	IP66
2	Charging input	DC5V/1A	7	Temperature	-10~50°C
3	Charging time	2~3h	8	Size	90x75x53mm
4	Lamp brightness	7 Stages	9	Weight	130g
5	Light mode	7 modes	10	Install	Cable-tie fixing

### Warning

- Please don't open the tail light without confirmation. If the tail light is damaged due to private opening, our company shall not take responsibility.
- If you don't use tail light over 3 months, please recharge the tail light. Otherwise it may cause the battery damage and reduce the life of battery because of excessive discharge.
