# Product functions

## Why does skin get dehydrated?

Most skin problems caused by dehydration

In daily life, women are more likely to try various methods to prevent skin from dehydration by using a pile of skin care products like face mask, toner or essence lotion. However, many skin problems, like spot and acne, still emerge. Why? That is because skin pores are clogged by dirty things which fail skin to absorb skin care nutrition. Now with this device, you are going to clean your skin completely, addressing skin problems like acne, wrinkles.

### Exfoliation:

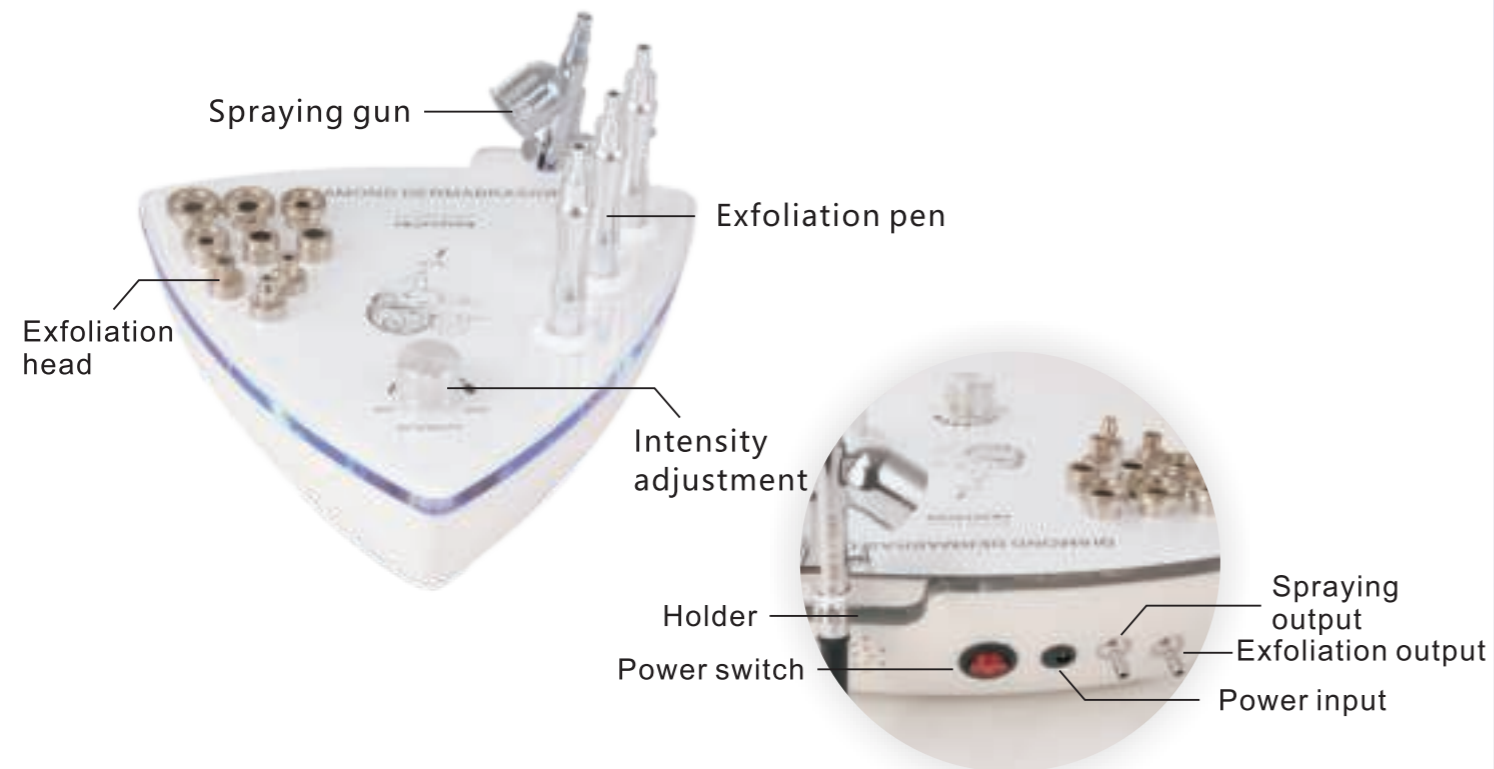

The exfoliation head mounted on the exfoliation pen comes with inlaid crystallite particles which is effective in removing dead skin and promoting skin metabolism. The exfoliation is a non-invasive way of skin care method which is safe and effective in addressing skin problems like acne, large pores and fine wrinkles.

### Spraying :

The diameter of skin pore is about 0.02--0.05mm which is easy for water molecule to enter in. With the help of the spraying function, the water molecules can be divided into smaller particles with diameters 0.3--0.5um(about 0.0003--0.0005mm) to help skin absorb in skin care nutrition and balance water intake for skin.

The spraying apparatus mounted on the device is designed to “process” the liquid through it. Specifically, this spraying apparatus can vaporize the liquid through it to make the particles of the liquid to be more effectively absorbed by skin.

# PRODUCT DISPLAY

# PRODUCT PARAMETERS

Product name: Diamond Exfoliation Spraying Device

Product mode: LB197

Device size: 230\*245\*80mm

Packaging size: 335\*260\*105mm

Net weight: 2.7kg

Power input: 100-240V 0.8A 50/60Hz

Power output: 12V=4.0A

Device accessory:

1 Main device\*1

2 IPVC vacuum tube\*2

3 Exfoliation pen\*3

9 Exfoliation head\*9

1 Spraying gun\*1

1 Device cable\*1

1 Spraying gun packaging case\*1

1 Exfoliation head and sponge packaging case\*1
