

Ostomy Scissors

- ★ Curved Blades, Rounded Ends, Circular Cuts, Latex-Free
- ★ Ostomy scissors with curved blades, designed to facilitate the circular cuts made when cutting your ostomy baseplate to your stoma size, for a snug fit.
- ★ The upper blade is 'designed'- ensuring that the baseplate does not slip while being cut, while keeping the scissors in place This makes it much easier to control, ensuring a smoothly cut line
- ★ The lower blade has a rounded end- guiding the circular cutting and avoiding damage to the pouch of a one-piece system

Caution:
Instrument is not recommended
for invasive Medical Procedures.
