

Lashnovo Cream Remover

Package Leaflet

Active ingredient: Not applicable

Read this leaflet carefully before using Lashnovo Cream Remover. This product is available without a prescription. To achieve the best results, follow the instructions in this leaflet carefully. If you have any questions or concerns, consult a healthcare professional.

What is Lashnovo Cream Remover and what is it used for?

Lashnovo Cream Remover is specifically formulated to remove adhesive residues and mascara from eyelash extensions. It is designed for external use on the eyelashes.

How to use Lashnovo Cream Remover?

- Apply a small amount of the cream to a cotton pad or applicator.
- Gently close your eyes and apply the cream along the lash line where the eyelash extensions are attached.
- Allow the cream to sit for a few minutes to soften the adhesive.
- Carefully wipe along the lash line to remove adhesive residues and mascara.
- Rinse thoroughly with water.

When should you not use Lashnovo Cream Remover?

- If you are allergic to any of the ingredients in the cream.
- Avoid contact with the eyes and mucous membranes.

Side effects:

In rare cases, side effects such as irritation or redness may occur. Discontinue use if irritation persists and consult a healthcare professional.

How to store Lashnovo Cream Remover?

Store the tube in a cool, dry place, out of reach of children.

Packaging:

Lashnovo Cream Remover is available in a 5 or 10 gram tube.

For further information, refer to the packaging or contact the manufacturer.
