Batch Code: **11055**

Intructions for use:

Simply plug handsets into the ends of the tubing and start speaking. There are enough pieces to make a network of 8 users. Alternatively you can set up the handsets with just 2 users (one at either end of a length of tubing). Extend the length of your conversations by adding in-line connectors. Use the green in-line connectors to extend the length of the tubing and purple Y connectors to split the line into two. To clean, wash out the mouth pieces and connecting tubing using warm soapy water.
