H137 2.4G

2.4G Remote-Controlled Motor Boat Operation

- 1.The boat will automatically power on when placed on water, and connect to the remote control.
- 2.Do not pilot the boat more than 50m away from the remote control, otherwise connection will be lost.
- 3.The boat can be operated for approximately 20 minutes when fully charged. Make sure to bring it back within range 5 minutes before, when the controller's light flashing, it means the boat will in the lower battery, you should return back the boat under the control range, otherwise it may run out of battery somewhere you cannot reach.
- 4.The boat does not have a self-righting function, so take care not to flip it or crash into obstacles during operation.
- 5.Avoid aquatic plants during operation, as these may get entangled with the propeller.
- 6.The rudder direction must be adjusted manually.
- 7.Overdistance warning : The remote control will send out beep sound when the boat is running out of control range.
- 8.Low power warning:
 - A.When the model in the lower power, the remote control and the boat's light will flashing.
 - B.When the model in the lower power, the remote control will send out alarm.(After the alarm sounds, please get the boat back immediately, prevent the model without electricity in coming back)
