

INTRODUCTION

Multifunction Digital Movable Charger, using the Efficient Boost Converter and Battery Protective IC.

It is with Built-in Intelligent identification chips, are able to identify different kinds of digital product's voltage~electric current.

Reaching available charge, it is with built-in high-capacity battery, small appearance, wide scope of application, longevity life, high-performance, you can use it to charge your cell phone.

WARM REMINDER

Please charge the power bank every 3 months if the power bank not be used for a long time.

It's normal that the temperature is a bit high during charging.

Please keep the power bank clean and dry, do not wash the power bank with chemistry depurative.
