Our Absolute White® brush-on whitening gel pen contains ingredients that help to restore teeth to their natural whiteness. The Absolute White® non-abrasive formula can be used at home or on-the-go.

Directions:

1. Firstly clean teeth by flossing and brushing, preferably with a whitening toothpaste before each application.
2. Shake pen, remove brush cover and twist clockwise until gel is released and covers brush head.
3. Apply a thin layer of gel directly onto the front surfaces of the upper teeth, avoiding gums and lips. Allow to dry for 5 minutes before brushing your teeth to remove any residual gel.
4. Repeat process on lower teeth.
5. For best results, use 2-3 times per week and avoid eating or drinking for 15 minutes after the application. We recommend you do not use more than 3 times per week as this may cause tooth sensitivity.

Warnings & Safety Advice:

1. Use the product only as directed and for its intended use. This product is for adults only. Keep out of reach of children. Not recommended for pregnant or breast-feeding women.
2. For use only on natural teeth. Do not use this product on orthodontic treatments (fillings, crowns, implants). Avoid contact with lips, tongue and gums. We recommend you do not lie down while carrying out the treatment.
3. Do not use if allergic to any ingredients. If irritation, swelling or sensitive teeth symptoms develop, stop use of the product immediately and rinse thoroughly. Consult a dental professional or doctor if irritation continues. Do not use if you have gum disease, gingivitis, bleeding or severely receding, inflamed or irritated gums.
4. For external oral use only. Do not swallow. If a significant amount is swallowed, please call a doctor. More than 3 applications per week is not recommended.
5. Keep away from eyes, rinse immediately with clean water if product comes into contact with them.
6. Avoid contact with clothing as it may stain or discolour fabric.
7. Prolonged use of Chlorine dioxide-based tooth whitening may cause damage to the tooth enamel and cause sensitivity.
