

3. Operating time and charging function*

The microphone has an integrated 3000mAh battery. The operating time is approximately 60 hours.

You can charge the microphone at any time (even during use) via the **USB charging socket (8)**. Connect the included USB charging cable to a 5V power source for charging.

**The "VOX microphone AE6491" does not have an integrated battery, since the power supply for this model is provided directly via the Albrecht CB radio. A charging function is therefore not required.*

4. CE declaration of conformity

Standards and directives

Alan Electronics GmbH hereby declares that the Albrecht VOX microphone is in accordance with Regulation 2014/53/EU. The full text of the EU declaration of conformity can be found at the following

Internet address:

4.1. EEAG and Recycling

European laws prohibit the disposal of old or defective electrical or electronic equipment via household waste. To dispose of the device, return it to a collection point in your municipality for recycling. This system is financed by the industry and ensures environmentally friendly disposal and recycling of valuable raw materials.
