

UNDERGATE HT CABLE (U-SERIES)

This U-Series high voltage insulated electric fencing cable is used to carry the voltage from the energizer to the electric fence in a safe and insulated manner. It can also be used to carry the voltage under gates to the next section of fence. This underground cable is suitable for use with galvanised wires, aluminium wires and all poly wires, poly ropes and poly tapes.

Features:

- Heavy duty design for harsh environments
- Double insulated UV stabilised outer and inner sheaths
- 1.6mm diameter inner conductor wire for medium cable runs
- 2.5mm diameter inner conductor wire for long cable runs and large fences.

Specifications:

Material	Solid heavy galvanised inner conductor
Roll size	25m 50m 100m 200m 500m
Colour	Black
Diameter	1.6mm 2.5mm
Resistance	1.6mm - 98 Ohms/km 2.5mm - 36 Ohms/km
