Motion-Activated LED Night Light

Sophisticated, high quality sensors ensure this efficient light only activates in the dark when there is motion nearby and then automatically shuts off after 15-30 seconds prolonging battery life.

Follow the steps below to install your lights in minutes!

1. Install Batteries

2. Stick Anywhere

Batteries not included.

Twist off the cover to reveal the battery compartment and insert three AAA batteries.

1. Remove liner from one side of 3M pad to reveal sticky surface.
2. Stick 3M pad to the back of your night light.
3. Remove remaining liner from 3M pad.
4. Stick your night light anywhere you need light!

Or use the built-in magnet for metal surfaces.

Specifications:
Power Source: Battery powered
Motion Sensor Range: Up to 10 feet
Lumen Output: 10 lm
Working temperature: -20 to 40 degrees Celsius
Bulb Design Life: 10,000 Hrs.
Operating voltage: 4.5V
