8.LANGUAGE SETTING

1. Select "Setting" on the projection image.

2. Select "Other Setting"→"Language Setting"
   on the projection image.

3. Select the language you want to use.

10.BLUETOOTH CONNECTION

1. Select "Setting" on the projection image.

2. Select "Bluetooth Setting" on the projection image.

3. Turn on the Bluetooth function and wait for the
   projector to search for available Bluetooth devices.

11.WIFI CONNECTION

1. Select "Setting" on the projection image.

2. Select "WiFi Setting" on the projection image.

3. Wait for the projector to search for available networks.

4. Choose your network name and enter the password to connect.
(Ensure you have your own WiFi at home. If not, please open your
phone personal hotspot to create the WiFi, and then connect to it.)
12.WIRELESS SCREEN MIRRORING

•For iOS Device

1. Make sure that your iOS device is connected to the
   same network as your projector.

2. Select "HummingBirdCast" on the projection image.

3. On your iOS device, open "Control Center" and tap "Screen Mirroring".

4. On your iOS device, looking for devices that can be mirrored on.

5. Select "Projector-XXXX" from the list.

•For Android Device

1. Select "MiraCast" on the projection image.

2. Turn on the wireless projection function of your Android device.

3. On your Android device, looking for the signal of the projector device.

4. Select "Projector-XXXX" from the list.
13.WARM TIPS

1. Due to the built-in LED bulb, heat will be generated when the projector is working. Don't worry, this is normal.

2. Due to HDCP copyright restrictions, when using screen mirroring to connect to a mobile phone, this projector does not support playing videos from platforms such as Netflix, Amazon Prime Video, and Hulu.

3. The fluency of wireless projection depends on the connected network and your phone model.

4. The USB interface can only be connected to USB flash disk. If your USB flash disk capacity exceeds 32GB, the format should be modified to NTFS.

5. When using the wired projection function, please use the USB-C/Lightning to HDMI data cable.

6. When your devices are connected via HDMI and USB ports, parameters such as brightness and contrast can be adjusted. When the projector is playing video, press the menu button on the remote control to enter the setting, you can choose a variety of modes, adjust the picture and sound parameters.

7. If the remote control is lost, we will send a new one to you. If you have any operational problems, please let us know, and we will send operational steps and instructional videos to help you.
