

QUICK START GUIDE

Konftel AV Grabber

KONFTEL AV GRABBER

The Konftel AV Grabber enables you to connect to the Konftel CC200 via cable to use a computer as presentation source, both for image and audio.

IMPORTANT NOTICE

Read all safety, installation, and user documentation prior to installing or operating this product.

To view and download safety, installation, and user documentation go to konftel.com/support.

WHAT'S IN THE BOX

Konftel AV Grabber

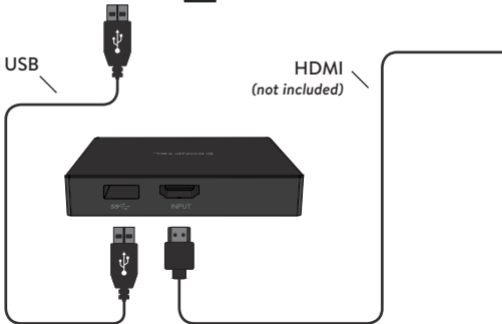

2.5 m USB Cable

SETUP

USB

HDMI
(not included)

SETUP

Computer to be used as presentation source

CONNECTING

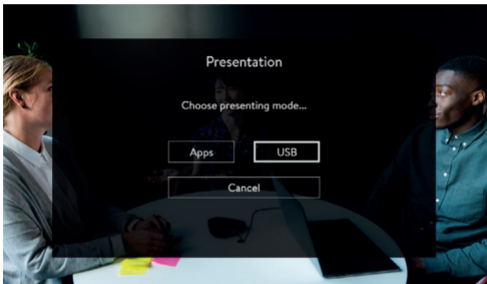

1. Connect the computer to be used as presentation source to HDMI INPUT connector on Konftel AV Grabber
2. Connect the Konftel AV Grabber to the Konftel CC200 using the provided USB cable.

The computer will be used as video source for content on the CC200.

Note: Not all the resolutions from the computer are supported.

Once the AV Grabber is connected as described in this guide, press the **Present Button** ().

DURING A CALL

A menu on screen will show all the available options: just select **USB** among them and the CC200 will start sharing the content of the connected PC/Mac.
