These adapters meet the requirements of the CE mark and are RoHS compliant. The adapter is made of plastic and is not suitable for use in wet or humid environments. The adapter is not suitable for use in environments with high temperatures or high humidity. The adapter is not suitable for use in environments with high voltages or high currents. The adapter is not suitable for use in environments with high frequencies or high power levels. The adapter is not suitable for use in environments with high magnetic fields or high electromagnetic interference. The adapter is not suitable for use in environments with high radiation levels or high ionizing radiation. The adapter is not suitable for use in environments with high levels of vibration or high levels of shock. The adapter is not suitable for use in environments with high levels of dust or high levels of dirt. The adapter is not suitable for use in environments with high levels of salt or high levels of corrosion. The adapter is not suitable for use in environments with high levels of acid or high levels of alkali. The adapter is not suitable for use in environments with high levels of oil or high levels of grease. The adapter is not suitable for use in environments with high levels of smoke or high levels of fumes. The adapter is not suitable for use in environments with high levels of steam or high levels of heat. The adapter is not suitable for use in environments with high levels of noise or high levels of sound. The adapter is not suitable for use in environments with high levels of light or high levels of UV radiation. The adapter is not suitable for use in environments with high levels of oxygen or high levels of air pollution. The adapter is not suitable for use in environments with high levels of humidity or high levels of moisture. The adapter is not suitable for use in environments with high levels of salt or high levels of corrosion. The adapter is not suitable for use in environments with high levels of acid or high levels of alkali. The adapter is not suitable for use in environments with high levels of oil or high levels of grease. The adapter is not suitable for use in environments with high levels of smoke or high levels of fumes. The adapter is not suitable for use in environments with high levels of steam or high levels of heat. The adapter is not suitable for use in environments with high levels of noise or high levels of sound. The adapter is not suitable for use in environments with high levels of light or high levels of UV radiation. The adapter is not suitable for use in environments with high levels of oxygen or high levels of air pollution. The adapter is not suitable for use in environments with high levels of humidity or high levels of moisture.
