1. Quick install

Take the item out of the box, in this case the SH30P4. Then connect the USB Type-A cable to your device. When this has been done. An Led indicator shows when the hub is connected and ready for use.

2. Overview

This product has been developed with the slimmest possible USB hub in mind. This minimalist appearance makes it easy to carry. Because the hub works with the USB 3.0 standard, it is possible to achieve speeds of up to 5Gbps. You will notice this especially in the fast and stabile file transfers. However, those speeds will not be achieved when you connect the device to a USB 2.0 or below. The device is backwards compatible. So in this case it will maintain the USB 2.0 speed or lower.

3. What is in the box

You could find the following items in the box:

- The USB Hub (SH30P4)

- The manual (This one)

4. Compatibiliteit
- The SH30P4 can be used with: printers, external hard drives, mobile devices, card reader, media players, mice, keyboards, USB sticks and most commonly used USB devices
- The hub can be used for Windows, MacOS or Linux. (MacOS may need to be updated before it is possible to use a USB hub)
- Not all Wireless adapters work through a USB hub. These often have to be fed via the Host Bus.

5. Removal of devices

Do not unplug devices from the USB hub without first knowing that no data is being written to it. This can damage the device and result in loss of data and possibly destruction of the device.

6. Warning

Always be careful when working with (External) hard drives. With a small impact it is possible that data is lost, or the devices stops working completely.

Do not cut, puncture or crush this product. Keep the product at a safe distance from children. Keep the item away from fire, heat, liquids and strong magnetic fields. Do not disassemble or repair this product without authorization from PEXIL.
