IT Sbattitore

# High power, 500 W mixer

This Princess hand mixer has a sturdy and stylish look, but what is more important is the power it can produce. With its 5 speed settings and a turbo function supported by 500 watts of power, you can be assured that any dough can be mixed, no matter its consistency!

# Accessories and storage box included

Multifunctionality is essential to get the most out of your hand mixer. A set of beaters, dough hooks, and a whisk all made of stainless steel are the key to your perfect recipe. Use the convenient storage box that can be attached to the mixer to easily put away your accessories.

## Easy to clean

Pushing the eject button causes the accessories to immediately eject from the hand mixer. All accessories are dishwasher safe, so you can clean these parts effortlessly. Finally, the power cord of 1 metre allows for complete ease of use.
