Sometimes you need a little extra light and some magnification on your projects. When you're working on fine details of nails, news, electronics, make-ups, stamps, watches or any precision arts and crafts projects, and maybe you can't rely on your naked eye, you definitely need our high-quality magnifying lamp. Additionally, it's much more easy to find anything under the LED bulb. Our product is immensely flexible due to the spring-balanced tension bars that can be locked on several places. With these convenient additions, let those be in your office or room, your view will be enlarged, but your cost can remain small.

AC 230 V • 50 Hz  
6 W • 30 SMD LEDs
