Dear Customer,  
This mesh nebulizer is intended for inhalation therapy for asthma, chronic bronchitis, and other respiratory illnesses. Please read through these instructions carefully so that you understand all functions and safety information. We want you to be happy with your Microlife product. If you have any questions, problems or want to order spare parts please contact your local Microlife-Customer Service. Your dealer or pharmacy will be able to give you the address of the local dealer in your country. Alternatively, visit the internet at [www.microlife.com](http://www.microlife.com) where you will find a wealth of valuable information on our products. Return instructions in a safe place for future reference. Stay healthy - Microlife AG!

**Use the instructions carefully before using this device.**

## 1. Important Safety Instructions

- This device may only be used for the purposes described in these instructions. The manufacturer cannot be held liable for damage caused by incorrect application.
- Never touch the metal mesh in the nebulising head with your hands or foreign objects.
- This device should only be used with original accessories as shown in these instructions.
- This device contains electrical components and must be treated with caution. Observe the storage and operating conditions described in the Technical Specifications section.
- Use the medication recommended for you by your doctor and follow your doctor's instructions with regard to dosage, duration and frequency of the therapy.
- The liquid for nebulising should be prepared below 20°C (68°F) saline or water according to your doctor. No tap or boiled water can be used. The container used for the preparation of liquid must be sterilized. Never use liquids which contain ester, oily or suspended particles (including infusions of herbs); specifications may vary with the medication type used. If the device is not going to be used for a prolonged period, the batteries should be removed.
- Do not use this device if you think it is damaged or repair anything unless:
- Never open this device.
- Protect it from:
- water and moisture
- extreme temperatures
- infectious agents
- contamination and dust
- direct sunlight
- heat and cold
- flammable gas, heating units and open fire
- corrosive liquids

- To avoid any risk of electric shock when using this device please observe the following:
- Never use the device close to any electrical circuit such as a bathroom fan when the power cord or the main unit has gotten wet.
- Never plug in or unplug the adapter cable with wet hands.
- Check that the supply voltage at the power socket is correct, as it can not overload to the device.
- Unplug the device from the power supply before cleaning.
- Do not use this device close to strong electromagnetic fields such as mobile telephones, etc.
- Keep a minimum distance of 3.3 m from such devices when using this device.
- Ensure that children do not use this device unless supervised, some parts are not suitable to be swallowed. Be aware of the risk of strangulation in case this device is supplied with cables or tubes.
- Use of this device is not intended as a substitute for a consultation with your doctor.

Describe / Symptom / Possible cause	Solutions
Lower nebulising light is on.	1. Indicator light lights up red. 2. Nebulising head is blocked.
No power and/or no nebulisation.	1. Batteries polarity are reversed. 2. Low battery voltage. 3. Adapter is not correctly connected to the main unit or the power socket. 4. Incorrect installation of nebulising head. 5. Dry electrode pole of the main unit.

## 2. Preparation before Use

Inserting the batteries (3) (3) First insert the battery. The battery compartment (3) is on the bottom of the device. Insert the batteries (2 x 1.5 V, size AA), thereby observing the indicated polarity.

Maintaining the device (3) After you have used the device, always clean the nebulising head with water and a soft cloth. The nebulising head can be cleaned in a dishwasher (only with the main unit). Use of this device is not intended as a substitute for a consultation with your doctor.

## 3. Using the Device for the First Time

- Strip the nebulising lock (1) -B upward to open the nebulising head.
- Fill the medication as per your doctor's instructions into the drug storage area (4). Ensure that you do not exceed the maximum level.
- Press the nebuliser lock (1) -B downwards; a click sound indicates that the nebuliser cover (1) -A is closed correctly.
- Connect the mouthpiece or a face mask as shown in picture (13) and (18).
- The mouthpiece gives you a better drug delivery to the lungs.
- Choose between adult (1) or child face mask (1) and make sure that it encloses the mouth and nose area completely.
- Start the nebulisation by pressing the ON/OFF button (6); the indicator light (4) will light up green.
- Breathe in and out calmly during the therapy. Sit in a relaxed position with the upper body upright. Do not be done while inhaling. Stop inhaling if you feel unwell.
- To stop the nebulisation during the therapy, press the ON/OFF button (6); otherwise the nebulisation will automatically shut down when the liquid has been fully used.
- If the Microlife mains adapter is used, unplug the device from the power socket (2) -A before using the nebuliser (1) -B.
- Press the «PRESS» button (8) on the rear of the main unit (3) and gently pull the nebulising head (1) out (7).
- Empty the remaining medication from the nebulising head and clean the device as described in the section «Cleaning and Disinfecting».

## 4. Cleaning and Disinfecting

Thoroughly clean all components to remove medication residuals and possible impurities after each treatment.

- Always wash your hands well before cleaning.
- Use disinfectant for daily cleaning.
- Clean the main unit only with a soft, dry cloth.
- Do not expose the main unit to water or heat.

## 4.1. Important Safety Instructions

- Strip the nebulising lock (1) -B upward to open the nebulising head (13). Fill the drug storage area with hot tap water (max. 70 °C). Close the nebulising head and shake for 30 seconds.
- Run the device for 1-2 minutes in order to clean the nebulising head.
- Wash all nebuliser components (except main unit) under warm tap water (max. 70 °C) for about 5 minutes adding if necessary a small quantity of detergent following dosage and use limitations as provided by detergent manufacturer.
- Remove thoroughly making sure that all deposits are washed away and leaves to dry.
- Store the device with all parts in a dry, clean place.
- Do not boil the main unit, nebulising head, mouthpiece and mask for 30 seconds.

## 4.2. Important Safety Instructions

- Turn the nebulising head (1) -B upward to open the nebulising head (13). Fill the drug storage area with hot tap water (max. 70 °C). Close the nebulising head and shake for 30 seconds.
- Run the device for 1-2 minutes in order to clean the nebulising head.
- Wash all nebuliser components (except main unit) under warm tap water (max. 70 °C) for about 5 minutes adding if necessary a small quantity of detergent following dosage and use limitations as provided by detergent manufacturer.
- Remove thoroughly making sure that all deposits are washed away and leaves to dry.
- Store the device with all parts in a dry, clean place.
- Do not boil the main unit, nebulising head, mouthpiece and mask for 30 seconds.

## 4.3. Important Safety Instructions

- Turn the nebulising head (1) -B upward to open the nebulising head (13). Fill the drug storage area with hot tap water (max. 70 °C). Close the nebulising head and shake for 30 seconds.
- Run the device for 1-2 minutes in order to clean the nebulising head.
- Wash all nebuliser components (except main unit) under warm tap water (max. 70 °C) for about 5 minutes adding if necessary a small quantity of detergent following dosage and use limitations as provided by detergent manufacturer.
- Remove thoroughly making sure that all deposits are washed away and leaves to dry.
- Store the device with all parts in a dry, clean place.
- Do not boil the main unit, nebulising head, mouthpiece and mask for 30 seconds.

## 4.4. Important Safety Instructions

- Turn the nebulising head (1) -B upward to open the nebulising head (13). Fill the drug storage area with hot tap water (max. 70 °C). Close the nebulising head and shake for 30 seconds.
- Run the device for 1-2 minutes in order to clean the nebulising head.
- Wash all nebuliser components (except main unit) under warm tap water (max. 70 °C) for about 5 minutes adding if necessary a small quantity of detergent following dosage and use limitations as provided by detergent manufacturer.
- Remove thoroughly making sure that all deposits are washed away and leaves to dry.
- Store the device with all parts in a dry, clean place.
- Do not boil the main unit, nebulising head, mouthpiece and mask for 30 seconds.
