

# With 3LED Hand-held magnifier

## Replacement of batteries:

Open battery compartment

Insert three "AAA" new batteries

Cover the battery compartment;

## Application range:

offices, homes, printing, hospitals, stamps collecting, schools, machinery, jewellery appraisal etc.

## Feature:

- 1.Black alternating with white, the main body design is novel, simple and exquisite, presenting a new appearance for people.
- 2.Independent high-magnification jewellery magnifier can be used to appraise smaller objects.
- 3.Independent lighting design for the large and small lens of three LED lights can ensure better lighting effect for the visual field of large and small lens, being more convenient.
- 4.Independent triangular overlapped battery compartment design is compact, makes it easier for replacing batteries. Push battery cover slightly to open battery compartment, and close battery compartment after battery replacement is finished, with beautiful appearance, convenience and practicability.
- 5.Switch button adopts elastic material which can ensure comfortable operation.
