| 3. Audio Cable | 4. User Manual |

## Warm Tips

1. Use the 5V 1A/5V 2A charger to charge the headphones. Charging headphones with a charging device with excessive voltage may be damaged.
2. When the headphones have not been used for more than 3 months, you need to charge them before using them.
3. When not in use for a long time, it is recommended to charge the headphones once every 3 months, which can protect the battery more effectively.
4. Please charge the headphone before using.

## Warning

* Using headphones at high volume for a long time may cause damage to your hearing.

## Attentions

* Do not place headphones in high temperature, including direct sunlight.
* Do not place headphones near fire sources or other overheated environments.
* Do not put headphones in damp or submerged liquid, and keep them dry.
* Please don't try to charge the headphones by any other method except the provided charging cable.
* Do not disassemble the headphones, and any attempt to repair or modify the headphones is prohibited.
* Please pay attention to excessive drop, impact, scratch or other behaviors that affect the function of headphones. If there is any damage, such as dent, puncture, tear deformation or corrosion, please immediately stop using the headphones and contact the purchased merchant or contact us through the contact information on the warranty card.
* If the headset produces an abnormal smell, is higher than the normal temperature, and the color or shape changes abnormally, please stop using the headset immediately and contact the purchased merchant or contact us through the contact information on the warranty card.
