

The i1R 2 is an upgraded version of our popular i1R. This tiny keychain light reaches an incredible max output of 150 lumens thanks to the brand new high efficiency LED. It is built from aluminum alloy and features a built-in rechargeable Li-ion battery that charges through a Micro-USB port directly without removing the head. With a very compact size and dual light outputs, the i1R 2 is the perfect keychain flashlight for everyday carry.
