How do I change the inserts?

In order to change the inserts of the V3 TrendLine slicer, you just have to slightly lift the insert and pull it backwards.

After that, take the other insert and insert it head-on and push it forward until you hear a click.

How do I cut quickly and in a safe way?

Always use the safety fruit holder when you are cutting.

You can pierce fruits and vegetable on the fruit holder's metal rods by pulling the top part upwards. Then, swiftly guide the fruit holder in the direction of the arrow over the V-blade, up and down. When there's only a small part of the fruit or vegetable left you can push the top part of the holder downwards.

Are there more inserts I can use for my V3 TrendLine slicer?

There are 3 more inserts you can use with your V3 TrendLine slicer:

Blade insert 1.6 mm

Blade insert 4.5 mm

Blade insert 10 mm

The inserts are currently not available separately on Amazon but on our website www.borner.co.uk.

What is the expected lifespan of my V3 TrendLine slicer?

Numerous clients have written us that their Borner slicer has been used for years, if not decades. The average lifespan adds up to 10 years and more. If used daily in a professional environment, for example catering or gastronomy, there is a chance that tools will need to be replaced earlier.

What does the BPA-free logo on the packaging of my Borner product mean?

All our plastic Borner products are made without using the harmful and chemical compound Bisphenol A. This means that by relying on Borner, you can prepare and enjoy all your meals without any concerns.

Is my slicer dishwasher-safe?

We do not advise you to clean your slicer in the dishwasher because elevated temperatures and aggressive cleaning agents can impair the life span of our products. Better rinse it under running water after each use.

What are the differences between the V1, V3, V5 and V6-slicers?

The main differences between the V1, V3 and V6 slicers and the newer V5-slicers lie in their design and features.

The V3 with its two inserts as well as the slice insert and the safety insert offers six different ways of cutting overall: extra fine, fine, medium and thick slices as well as small and big cubes. Many of our clients know our cutting techniques from older models such as the Borner V1 and the previous model of the V3. Due to the familiar handling, they gladly choose the V3.

The V5 includes 2 inserts as well as a safety insert which serves as a child-proof lock. It can be used to cut slices in four different thicknesses as well as coarse and thin strips or cubes. Overall, there are 10 different ways of cutting available, which can be expanded by purchasing the 10mm-insert which is available separately.

The V6 has, unlike the V5, no possibility to adjust the inserts. It has the exact same functions as the V3 but it comes in a more classic style with its stainless-steel look. Due to the high-quality stainless steel and its longer life span this slicer is used especially in professional kitchens.

Can you order by phone?

We are available from 8.00 am to 4.30 pm under our service number +49 6575 – 95120. There you can also submit an order by phone to our employees. We're happy to help.

Do you have spare parts for old slicers?

If you are looking for old spare parts, please call our service number or write an email and attach a photo of your slicer. Based on the image, our employees can recognize your slicer model and find suitable spare parts.

What does Borner stand for?

Borner sees itself as a representative for well-being and vitality through a healthy and balanced diet. With more than 60 years of experience in the field of kitchen products, Borner has become a synonym for high-quality kitchen helpers.

Our slogan "Change your life!" reflects our claim to accompany our clients on their way to a better life. A healthy diet is the foundation for a better life. This is why we want to provide them with the right tool, allowing them to lay the groundworks for their own life.

Borner is simple, quick and healthy.

Are there any manuals available for the Borner slicer?

With your order, you should have received a detailed manual which explains the usage as well as how to change the inserts. If it is missing or you have lost yours, please contact our service team under +49 6575 9512-0.
