

Additional hadewe Product Information

Are hadewe machines Made In Germany?

Almost all of our products are manufactured in Hannover, Germany. Our family company has been in the production business for over 50 years. We have a manufacturing facility with CNC machines in which even most of our smaller spare parts are produced. The machines themselves are also assembled in our factory in Hannover.

Are the hadewe machines Medical Devices?

No, none of the devices featured in this catalogue are Medical Devices. They are cosmetic foot care products for the international market. If you are a resident of the European Union, please ask for our EU catalogue where we offer additional products.

Do the hadewe machines have a conformity mark?

Yes, all electric machines in this catalogue are available in 2 versions. Either with UK plug and UKCA mark or with German plug and CE mark. hadewe does not deliver products with the UKNI mark (for Northern Ireland) or other conformity marks.

What is the purpose of the use for the hadewe products?

The foot care products in this catalogue are non-medical devices and are used for drilling, grinding, milling, trimming and polishing in order to remove skin for cosmetic purposes only. They are explicitly not to be used to remove diseased skin.

Is hadewe an Authorized Economic Operator (AEO)?

Yes, we are an approved **Authorized Economic Operator**. The AEO concept is one of the main building blocks within the **WCO (Worlds Customs Organisation)**, using the **SAFE Framework of Standards (SAFE)** to guide international Customs Administrations towards a harmonised approach.

Does hadewe have an EORI number?

Yes, our **EORI (Economic Operators Registration and Identification)** number is DE2966069.

What are the customs tariff codes for the hadewe products?

The 8-digit customs goods numbers for the most important hadewe products are:

- 84672959 Rotating grinding machines (non-medical)
- 84679900 Parts for rotating grinding machines
- 90330090 Parts and spares for machines, appliances
- 94036030 Cabinets
- 42021299 Cases for mobile podiatry
- 94054099 Magnifying lamps

How are the units cleaned or disinfected?

The hadewe devices are designed to be compatible with rotating instruments which do not penetrate the skin or mucosal, or inadvertently may still cause injuries. For this application the following cleaning and disinfection instructions have to be carried out after every treatment:

- Remove the rotating tool (e.g. bur, capper, etc.) first. Then handle the tool according to the manufacturer's instructions.
- Remove tissue remains by wiping off the unit with a mildly moistened paper cloth. Afterwards clean all surfaces with disinfection cloth (for example the German MikroZid AF Tücher of Schülke and Mayr). There is no limit to the number of times this device can be cleaned and disinfected during its lifespan.
