

Explore, discover

Playmags™ building blocks are unique, the magnets attract on all sides, when flipped around. Children will effortlessly learn through creative play about geometric shapes, symmetry, architecture and basic math concepts such as counting, addition and subtraction through manipulation of the colorful pieces. Build a cube with six squares and notice how the first two pieces placed next to each other create instant support and allow additional pieces to be added easily. Young children love discovering play is the primary mode of learning for children. When a child has the opportunity to take flat objects and successfully construct 3D projects from them, the sense of discovery is very exciting and empowering. This toy offers hours and hours of fun - children can build various projects and let their imagination go wild with ideas. Create cubes, houses, airplanes, cars, fish and so much more!

30
PIECE SET
