

- ▶ Product Name: Anion purifier      Model: TS-05
- ▶ Rated voltage: 90 ~240V      Executive Standards: Q/SSQDB 001
- ▶ Input rated frequency: 50 / 60Hz      Rated power:  $\leq$  1W
- ▶ Product net weight: 51.3g
- ▶ Usage: plug in the power supply and press the switch. Please use it more than 0.5m above the ground.
- ▶ Matters needing attention:

# INSTRUCTIONS

1. This product is not for children under 14 years old. Please follow the instructions.
2. If water or solution enters into the product, please disconnect the power supply and stop using.
3. Please do not touch the negative ion release brush when the product is working.
4. Do not use the equipment beyond the rated voltage to supply power for this product.
5. Do not store or keep in direct sunlight, high temperature and humidity or near flammable materials. Do not use the product in a humid environment.
6. Do not throw the product into water.
7. If the product has serious heating or serious deformation during the power supply process, please cut off the power immediately and stop using.
8. Please paste transparent glue or other stickers on the wall corresponding to the brush on the back of the product, because the long-term release of negative ions at a short distance will change the color of the wall. If it is tile wall, then do not need to stick.
9. Clean the brush regularly to ensure the product effect. Please disconnect the power supply when cleaning.
