2. Cooking grid: **approx. Ø35cm**
3. Finish lid and bowl with **porcelain enameled**
4. Include 1 bakelite handles like the picture
5. Ash catcher such as the picture

CHARCOAL GRILLS

Easy To Clean

The One-Touch cleaning system provides hassle free cleanup of charcoal ash and debris by swiping it into a high-capacity, removable ash catcher.

Convenient Lid Placement

Conveniently slide the lid over to the side of the grill, and tuck it away, to avoid placing it on the ground while grilling.

Precision Heat Control

Control the temperature of your grill, without lifting the lid, by easily adjusting the dampers. Closing the dampers completely will cut the oxygen flow to help extinguish coals.

Withstands High Temperatures

Arrange charcoal on the fuel grate for either direct or indirect grilling.

Expanded Grilling Possibilities

Remove the circular grate insert and replace it with a griddle, poultry roaster, pizza stone or any of the many Gourmet BBQ System inserts (sold separately) to choose from. The hinged grates make it easy to add charcoal while grilling.

Shields Handle From Heat

The heat shield helps prevent your lid handle from getting too hot.

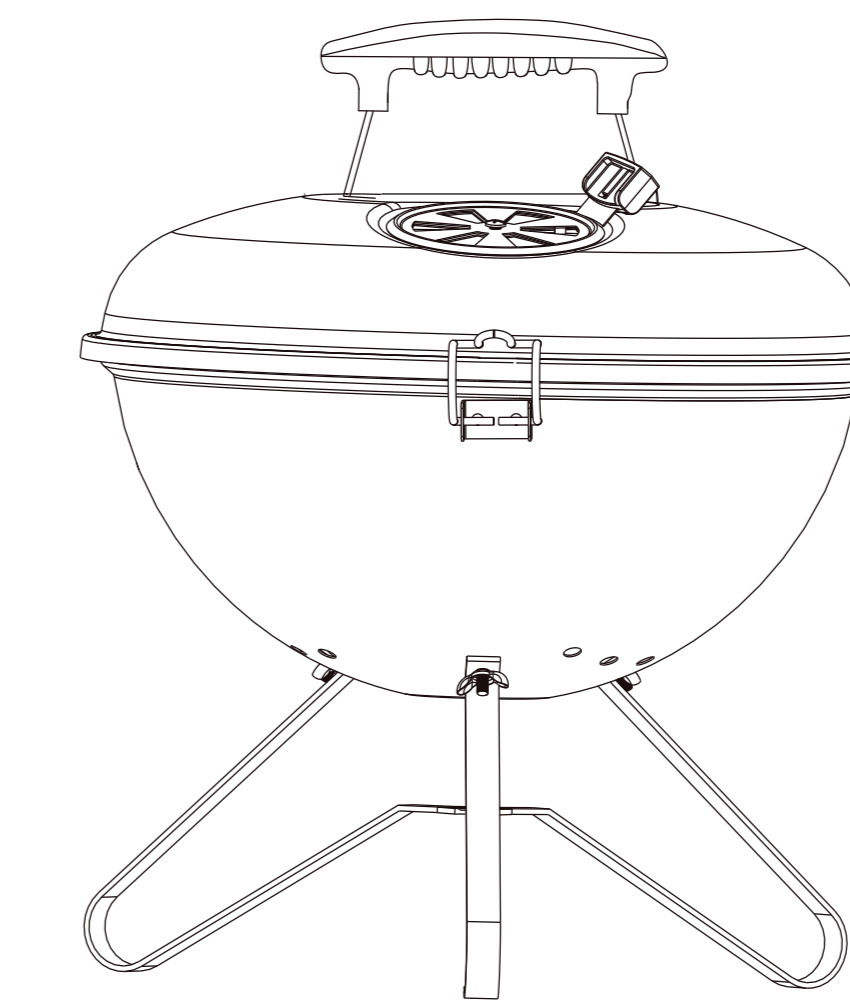

Superior Heat Retention

Porcelain-enameled lid and bowl retain heat for consistent temperature and even cooking. The finish also prevents rusting, cracking, and peeling while withstanding high grilling temperatures.

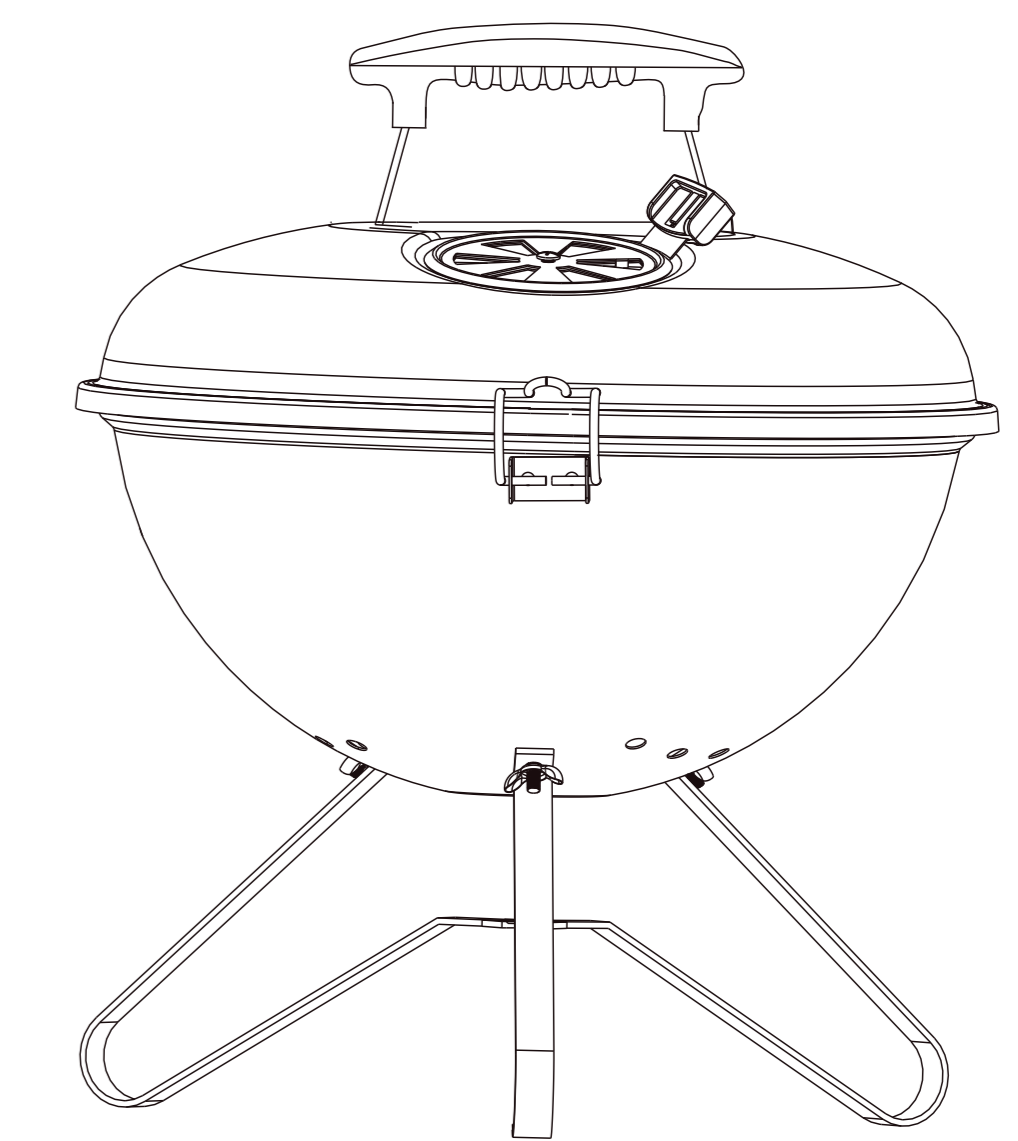

Manage Heat and Durability of the Heat

The top vent allows you to manage the heat and the durability of the heat.
