

FELLOW

# Atmos Vacuum Canister

## Guard the goods.

Atmos takes the hassle (and oxygen) out of storing coffee. Hidden inside the magic lid is a first-of-its-kind integrated vacuum pump which means your coffee—loose leaf tea, nuts, or “herbs”—last up to 50% longer.

CUSTOMIZE ME!

Ask your sales rep about how to customize Atmos.

## Features

### TWIST TO REMOVE AIR

Using Atmos is simple: pop on the lid, twist it back and forth, and feel the tension as oxygen gets sucked out of the chamber.

### GREEN MEANS GOOD TO GO

Watch the dot drop to reveal a green ring. The vacuum is now locked to prevent oxidation and extend the shelf life of your coffee by up to 50%.

### PRESS TO RELEASE

The built-in silicone ring stops air, moisture, odors, and other funk from seeping in. When the contents are calling your name, press the Easy Release Button on top to release the pressure and dig in.

## Colors

Available in matte black or white, the stainless steel canister shields your contents from flavor-sucking sunlight. Prefer to put them on display? Choose clear glass.

Matte Black
