Professional Curling Wand

## Operation

Select your barrel size and insert to handle. Make sure that it's locked

Insert the plug of the curling iron into electrical outlet, ensuring that the plug matches the socket

Turn on your curler by pressing the ON/OFF button. Select your desired temperature by using - or + buttons

Pressing the power button to "0" to turn off power, and then remove the plug from the electrical outlet  
only use on dry hair

## Care

Unplug the curling iron and let cool down  
Do not rinse with water, it may damage the curling iron

For cleaning handle, wipe with a moistened cloth. Do not use products that include benzene and/or paint thinner for it may damage the curling wand  
Clean often to avoid accumulation of dust and hair

## Storing

Turn ON/OFF switch off, and unplug  
Make sure the rose gold titanium barrel has cooled off

Do not wrap cord around the curling iron
