**Adapted for:** Industry, transport and warehouse

## Product benefits:

Monitor Charged Boa® is a sporty hiking/protective boot loaded with everything needed for a comfortable day on the job. The upper sports Boa® Fit System, which makes putting on and taking off the boot incredibly simple. The outsole is Monitor's new SIGMA sole, which is a new version of the now classic Alpha sole. SIGMA has a rubber outsole with a tread pattern that provides excellent grip on slippery surfaces. The midsole contains cushioning EVA with a strong torsion fork for even greater stability. The Monitex membrane makes the boot both waterproof and breathable. The generous toecap is made of aluminium. The shoe also features Monitor's SSCC memory foam insole.
